

SYSTEMS AND METHODS FOR IDENTIFYING ORIGINAL STREAMS OF MEDIA CONTENT

ABSTRACT OF THE DISCLOSURE

Systems and methods for identifying original streams of media content are disclosed. An exemplary method involves identifying at least one media content identifier in a media content directory. The media content identifier identifies media content. A plurality of stream access identifiers may be associated with the media content identifier. The method also involves identifying at least one stream access identifier of the plurality of stream access identifiers that includes access information for accessing an original stream of data from a media file comprising the media content. The method also involves providing identifier information about the at least one stream access identifier to a client in response to a client request.
